Ugwu Johnpaul Ifeanyi

Computer Science Student · Software Developer · ML Engineer

ugwujohnpaulifeanyi6@gmail.com 09130631242 Nigeria github.com/johnpa-a1

PROFILE

Computer Science undergraduate at the University of Nigeria, Nsukka, building practical experience in responsive frontend development, Python programming and introductory machine learning. Interested in internships, remote opportunities and freelance web projects.

EDUCATION

University of Nigeria, Nsukka
B.Sc. Computer Science in progress · 300 Level

TECHNICAL SKILLS

- **Frontend:** HTML5, CSS3, JavaScript
- **Programming:** Python
- **Machine Learning:** Fundamentals, data preprocessing, model training and evaluation
- **Tools:** Git, GitHub, VS Code and deployment platforms

SELECTED PROJECTS

NaijaBite restaurant website — Responsive restaurant website demonstration with menu filtering, mobile navigation, contact details and WhatsApp ordering. Live demonstration

Music listening & download platform — Frontend project exploring music browsing, browser playback and download flows with HTML, CSS and JavaScript.

Machine learning practice — Ongoing Python practice across data exploration, preprocessing, model training and evaluation.

INTERESTS

Frontend web development, artificial intelligence, machine learning, Python, data science and software development.
